

Meeting 7 Minutes

Thursday March 12th 2015

Attendance: Madhavi, Mathias, Miguel

Chair: Miguel

Official Minutes taken by: Mathias and Miguel

Start: 11:40 am

Agenda:

1. Precipitation (11:41 –11:54):

- implement in the Short/Long-term Forecast classes
- implement getTotalPrecipitation() method in CurrentWeather class which returns a running total of the precipitation level fields in the Short-Term Forecast class

2. Conversion class (11:54 -12:01):

- will contain a single static method convert(String value, String unitFrom, String unitTo) which will return a string containing the new value in the proper units

3. User Preferences (12:01-12:12):

- work on integrating with My Locations feature (will probably only have to deal with MainFrame class)

4. CurrentWeather (12:12-12:25):

- add a mainDescription field (and getter method) which will be used to set the background image

Action items:

Nicole and Tim: continue working on user preferences

Yibin and Madhavi: build Short/Long-term Forecast classes with analog fields and methods to CurrentWeather

Mathias: touch up GUI and work on Conversion class methods

Miguel: work on GUI actions, create skeleton and template method for Conversion class

Next Meeting: Thursday March 19th, Yibin as Chair (tentative).

End: 12:30pm
